<http://groups.yahoo.com/group/mmf/>

FUEL TANKS

Underground, above ground or basement fuel storage tanks require special handling prior to disposal or recycling. Most scrap metal dealers will accept them for recycling, but they require the tank to be cleaned & cut open. It is recommended that residents hire a professional contractor to remove & dispose of fuel tanks due to risk of injury, explosion or contamination. The following companies provide tank removal services, including disposal of leftover fuel. If you need to have groundwater tested, use a different company than the one removing the tank

Bill Barr, Inc. (L) (517) 372-5548
Bill Begole & Company (L) (517) 482-2500
IRWS (S. Lyon) (800) 440-1641
Westphalia Auto Salvage (989) 587-3060
